

You're more fragile than you think!

Dear employee,

It's not breaking news that eggs break easily. But have you ever realized that we might be equally "breakable"?

This year's campaign draws the comparison and with a twist focuses on everyday risks at work. Wearing adequate personal protective equipment can make the difference!

An egg that is about to be boiled to perfection, has more urgent problems than worrying about ear protection. However, in the workplace, the dangers of exposure to noise are sometimes forgotten. This is because damage to your hearing is usually the result of a gradual process; it does not happen suddenly.

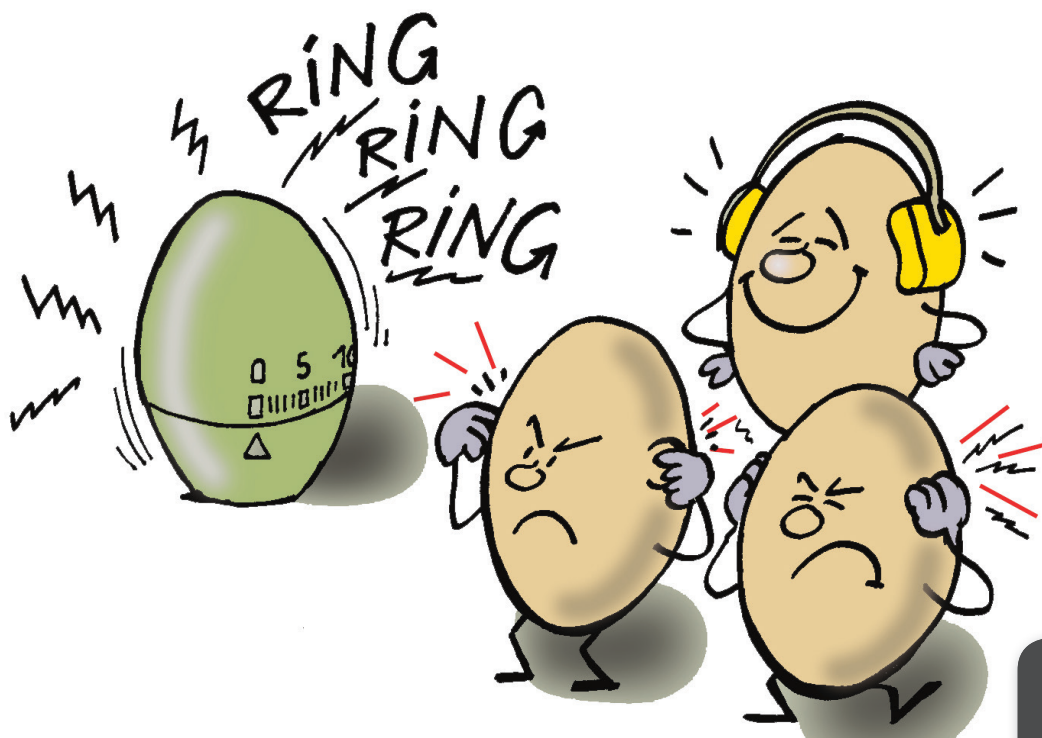

Once you start to notice the damage, it is already too late, because damage to your hearing is irreversible!

So protect yourself and be aware of all the risks that surround you, wherever you are or go, at home or at work.

Kind regards,

The board

Protect your ears before it's too late!
