

You're more fragile than you think!

Dear employee,

It's not breaking news that eggs break easily. But have you ever realized that we might be equally "breakable"?

This year's campaign draws the comparison and with a twist focuses on everyday risks at work. Wearing adequate personal protective equipment can make the difference!

A stay in the fridge is not always pleasant for eggs. Not only the cold air, but the aroma of mature French cheese can easily penetrate the porous eggshell. Hazards in the workplace are not the same as those in the fridge, but you too are more fragile than you think!

Harmful substances in the air are not always easy to detect, like the smell of ripe Camembert. Where necessary, you should always wear your respiratory protection equipment, even if you don't notice anything strange in the air.

So protect yourself and be aware of all the risks that surround you, wherever you are or go, at home or at work.

Kind regards,

The board
